## PROJECTS

---

**E-Commerce** - Developed a feature-rich e-commerce website using React, Tailwind CSS, Redux Toolkit, Node.js, Express.js, and MongoDB. Implemented secure user authentication (JWT), admin dashboard, and role-based access control for managing products and orders. Integrated product search, filtering, sorting, and pagination to enhance user experience. Utilized Redux Toolkit for global state management and optimized API performance. Added cart management, order tracking, and a secure payment gateway for a seamless shopping experience. Designed a fully responsive UI for smooth navigation across all devices ([Github Link](#))

**Movies Application**- Built an interactive and dynamic movie platform using React, Tailwind CSS, Redux Toolkit, Node.js, Express.js, and MongoDB. Implemented secure authentication (JWT), role-based access, and RESTful APIs for seamless data management. Users can browse movies, search, add favorites, and leave reviews/ratings with real-time updates. Optimized performance using Redux Toolkit for state management and efficient API handling. Designed a fully responsive and visually appealing UI for an immersive experience across all devices ([Github Link](#))
